Structure of a Typical Fish (With Diagram) The unpaired fins of the trunk region are generally dorsal fin (may be two, rarely three) and ventral or anal fin, which is present ventrally (near the anus or cloacal aperture). The expanded part of the fin is supported by thin skeletal rods, known as the fin rays. The trunk bears anal or cloaca aperture.

Structure of a Typical Fish (With Diagram)

Step 1: Let's draw a Tilapia! It is a very common fish. Start with the mouth by drawing a rectangular shape... Step 2: Draw the body by making two curved lines that almost form a large oval. Step 3: For the tail fins, draw a few lines curving outward and connected them with a straight line.

Parts of the Fish and its function

Fish such as bass that are piscivorous (eat other fish) have fairly short intestines because such food is easy to chemically break down and digest. Fish such as tilapia that are herbivorous (eat plants) require longer intestines because plant matter is usually tough and fibrous and more difficult to break down into usable components. A great ...
