Any application of typography can be divided into two arenas: micro and macro. Understanding the difference between the two is especially useful when crafting a reading experience, because it allows the designer to know when to focus on legibility and when to focus on readability.

How To Apply Macrotypography For A More Readable Web Page ...

Microtypography is the name given to a range of methods for improving the readability and appearance of text, especially justified text. The methods reduce the appearance of large interword spaces and create edges to the text that appear more even. Microtypography methods can also increase reading comprehension of text, reducing the cognitive load of reading.

Microtypography - Wikipedia

I'm sure most people don't really know the basic fundamentals of typography!". This is not an insult to anyone's knowledge. Many people on here haven't gone to school for design or haven't really done much reading on typography (which I suggest you get on!). I'm a huge lover of typography and love nothing more than a well treated type based design.
